

## Work Environment | **Vehicle Compound**

The Union, after having been in constant contact with the Administration for the past months in relation to the conditions of these quarters, we have been informed that the necessary worked will be carried out by the next fortnight.

The Union will evaluate the situation at that time. Our members are kindly asked to keep in touch with us.

We will continue to work so that all premises where our members use, are adequate, decent and equipped with all facilities.
