

# Industrial Dispute (3/21) | Registration

The Malta Police Union (MPU) registered an Industrial Dispute against the Commissioner of Police regarding immoderate assistance to TM or LESA when these need to remove vehicles (clearance).

Although the Union is not against our members giving assistance, the members of the Malta Police Force cannot be expected that apart from their normal duties, do the job of other entities, which may simply update and use their databases according to their needs.

With District officers overstretched, vacation leave continuously cancelled and motivation at an all time low, the Union cannot allow further, third party duties to worsen the situation. Assistance does not mean abuse as if our members are second class workers.
